

PROJECT LEADERSHIP

Anugraha Project Management Essentials

A single window solution for all your project management needs. We assist you to start and complete your projects on target first time and every time.

A project is a series of activities that have to be carried out in order to bring about a change or accomplish a desired goal and objectives. The project could be a personal one or it could be to implement some new ventures.

A project is the implementation of a change, with a beginning, middle and an end. It will also have a time frame, it will be unique, people are involved and it will have finite resource.

We hear about projects just about everywhere, as business recognize the need to become *Agile* and *Adaptive* in our approach. The business perception is changing rapidly and new ways of working can give us a real edge over the competition. But for this to work the projects that we initiate must be successful - and all too often they are not.

Successful project management is based on continuous learning and continuous value creating activities. We provide a valuable source of inspiration for novice project executives and the more experienced.

Anugraha project management essentials are straight forward. It is easy to execute, clear step by step value creating process flow that makes execution simple. We don't tell you or advice how to do it, we show you how. Finally, it creates a valuable value for you and your customers.

To be successful, you need to complete a project on time, within budget and with the expectations of your customers fully met. Whether your project is large or small, the means employed should deliver the desired results every time.

The majority of projects fail for a simple reason, the lack of adequate project management. We ensure your project will be successful by understanding what is involved in designing, organizing, executing and monitoring the projects.

Project management essentials-
Define - Master the art of understanding project and its meaning.

Organize - Organize your project without omissions, mistakes, or miscalculations.

Align - Use better techniques to get people aligned, support, and resources that are vital to the project's success.

Identifying and Eliminate - Root out waste in every stage of the project - wasted time, money and effort that endanger a project's success.

Use - Use indispensable planning and scheduling tools that assure the project is implemented exactly as planned.
